

## ECA ORDERS IXSEA ACOUSTIC RELEASES

ECA, specialists in robotic solutions for the defense and civil markets, placed an order for IXSEA acoustic releases as part of an underwater observatory project in the Mediterranean Sea.

“We chose IXSEA’s acoustic releases for their battery life of more than ten years,” said Mr Favaro, ECA’s Chief Buyer.

“They are suitable for all mooring applications in all seas and environmental conditions with their low power consumption and corrosion resistance.”

The OCEANO range includes oceanographic, coastal and heavy duty acoustic releases. Applications include: long-term instrumental moorings, shallow water remote-controlled operation, heavy load handling and pipe/cable laying.

With more than 25 years’ experience, IXSEA has more than 6000 acoustic releases in operation worldwide.

### **About IXSEA**

Formed in 2000, IXSEA designs and manufactures navigation and positioning systems based on its state of the art Fiber Optic Gyroscope technology, along with a complete range of seafloor mapping solutions for the scientific, offshore and defense industries.

IXSEA has more than 400 clients on five continents with a turnover of €38 million in 2008.
