

IXSEA INC APPOINTS CHEESMAN

IXSEA Inc is pleased to announce the appointment of Ed Cheesman as its new Gulf of Mexico Sales Manager based out of IXSEA's new offices in Houston, Tx.

Having recently relocated from Aberdeen, Scotland where he has been heading up UK Sales, Ed brings with him a wealth of application knowledge and experience in the Offshore sector.

Ed Cheesman said: "I am delighted to be in Houston and relish the opportunity of spending time working on solutions with our customers here in the Gulf. IXSEA continues to lead the market worldwide, manufacturing navigation, positioning and seabed mapping technologies, which not only bring real time and cost efficiencies to our clients' existing work scopes, but allow for new methods to be developed, designing out inefficiencies and bringing fresh possibilities to the subsea sector.

With the expansion of IXSEA's Offshore division over the past two years, IXSEA is better placed now than ever before to provide first class service, training and support to our clients wherever they are on the globe."

About IXSEA

The IXSEA Group is the world leader in Fibre Optic Gyroscope technology. Combining excellence in innovative design and technology, our teams design, execute and maintain a complete range of gyroscopes, navigation units, acoustic positioning systems, magnetometers, sediment sounders, acoustic releases and sonars. With a presence on all five continents, the Group has over 400 customers of reference in the scientific, offshore oil, construction and defense sectors on land, at sea, in the air and in space.

The IXSEA Group has nearly 230 employees and generated annual sales of €38 million in 2008.
